PROFESSIONAL SUMMARY

Backend engineer with 4 years of experience building Python services and data pipelines. Comfortable across the stack from API design to deployment.

EXPERIENCE

Software Engineer — Nexora Technologies

Mar 2022 – Present

- Built and shipped 12 REST API microservices in Python and FastAPI, serving 1.2M requests per day at p99 latency under 180ms.
- Reduced data pipeline runtime by 45% by rewriting batch jobs in Spark and moving orchestration to Airflow.
- Responsible for the team's PostgreSQL schema design and query optimization.
- Deployed services to AWS using Docker and GitHub Actions CI/CD, cutting release time from 2 hours to 15 minutes.
- Mentored 3 junior engineers through code review and pairing.

Junior Developer — Datalane Systems

Jul 2020 – Feb 2022

- Worked on internal reporting dashboards using Python and SQL.
- Helped with migration of legacy scripts to a scheduled ETL framework.
- Wrote unit tests with pytest, raising service coverage from 40% to 82%.

PROJECTS

Document Search Engine

- Built a semantic search prototype over 50k internal documents using sentence embeddings and FAISS, improving retrieval precision by 30%.

Sentiment Classifier

- Trained a text classification model with scikit-learn achieving 91% F1 on a customer feedback dataset of 40k labelled reviews.

EDUCATION

B.Tech, Computer Science — Visvesvaraya Technological University, 2020 | CGPA 8.4 / 10

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, Bash

Frameworks: FastAPI, Flask, Django

Data: PostgreSQL, Redis, Spark, Airflow, pandas, NumPy
ML: scikit-learn, FAISS, embeddings
Cloud & DevOps: AWS, Docker, Git, GitHub Actions, Linux
Practices: Agile, Scrum, unit testing, code review
